

## Refraction Policy

One of the most important parts of your eye exam is the refraction. That is the part of the exam by which we determine the best possible acuity for your eyes, which is an essential piece of medical information that is used to assess your eyes and search for medical conditions and other vision problems. It is NOT a covered service by Medicare and many other insurance plans. The refraction fee is collected at the time of service. This is in addition to any co-payment, co-insurance, or deductible your plan may require. Should your plan pay us for the refraction, we will reimburse you.

Yes, I have read the above information and understand that the refraction is a non-covered service. I accept full responsibility for the cost of this service and understand it is due at the time of service. I understand that any co-payment, co-insurance, or deductible I may have is separate from and not included in the refraction fee.

**Should you choose NOT to have a refraction and should you break and lose your glasses, we will NOT be able to provide you with a glasses prescription. You will be asked to schedule a return appointment and charged another office visit along with the refraction fee.**
